GETTING THE PERFECT FIT

Here's how to measure to ensure that you get the correct fit every time. Please note that it is best to measure over your undergarments for more accurate results and always hold the measuring tape level and firm but not tight. Any queries, just give us a call.

WAIST

Measure around your natural waistline.

HIPS

Measure around the fullest part of your hips which is usually about 20cm down from your waistline.

BUST

The most accurate bust measurement is achieved by measuring under your arms and over your bust. If you can get someone to do this for you while you hold your arms out to the side, even better!
